Aquarium

Dive into the AI-Powered Platform for ML Data Curation

Made by:
Rajveer Singh Bedi
bedi.rajveer09@gmail.com

"There are two ways Aquarium provides value to my company. First, we improved our model performance. Second, I spent less time and less clicks curating my dataset."

- Tom Shapland, CEO of Tule Technologies

Company Overview

Peter Gao

- Co-Founder/CEO
- Studied at UC Berkeley

Quinn Johnson

- Co-Founder
- Studied at UC Berkeley

Headquarters: San Francisco Bay Area, West Coast, Western US

A simple investment timeline.

2020

- Founding Year

Aug 22, 2020

- Seed Funding
- $125 000 from **Y Combinator**

Feb 24, 2021

- Second Seed Funding
- $2.6 million from **Sequoia Capital**

*Series A Compliant

Problems

1. Generating and indexing high-quality embeddings can be **challenging and costly** without the right infrastructure.
2. Identifying and addressing critical errors in model performance is **heavily time-consuming**.
3. Collecting **specific objects** or scenarios across large pools of labeled and unlabeled data to improve models.
4. **Scaling to handle datasets** containing hundreds of millions of data points.

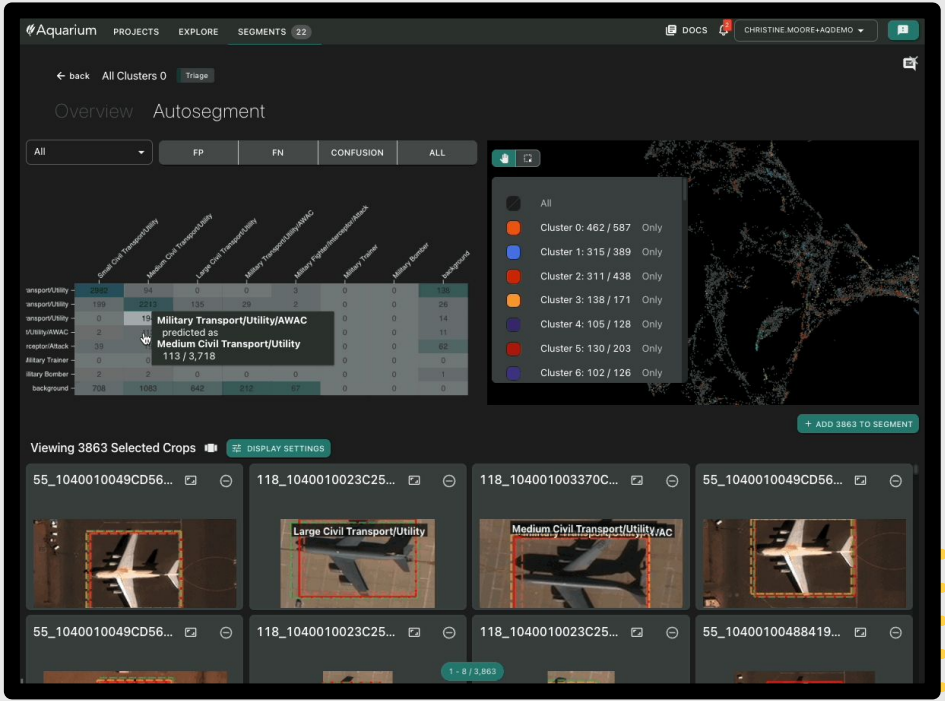

Solution

Aquarium's solution is an embedding technology that surfaces the biggest problems in your model performance and finds the right data to solve them 10x faster. [1]

How Aquarium Solves these Problems

- Aquarium reliably scales datasets containing hundreds of millions of data points, saving time and money
- Makes it way easier to find right subset of data, by creating “clusters” across large pools of labeled and unlabeled data.

Aquarium's Product/MVP

Aquarium Learning's value proposition is centered around B2B solutions to help machine learning teams more effectively manage their data and improve the performance of their models.

Neural Network Visual Interface only found in Aquariums Product

Features and Competitive Advantages

Features

1. Neural Network Embedding Workflows
2. Data Quality Analysis from Visualization
3. Automatic Model Evaluation
4. Data Collection and Sampling
5. Integrations with your favourite ML learning tools

Competitive Advantages

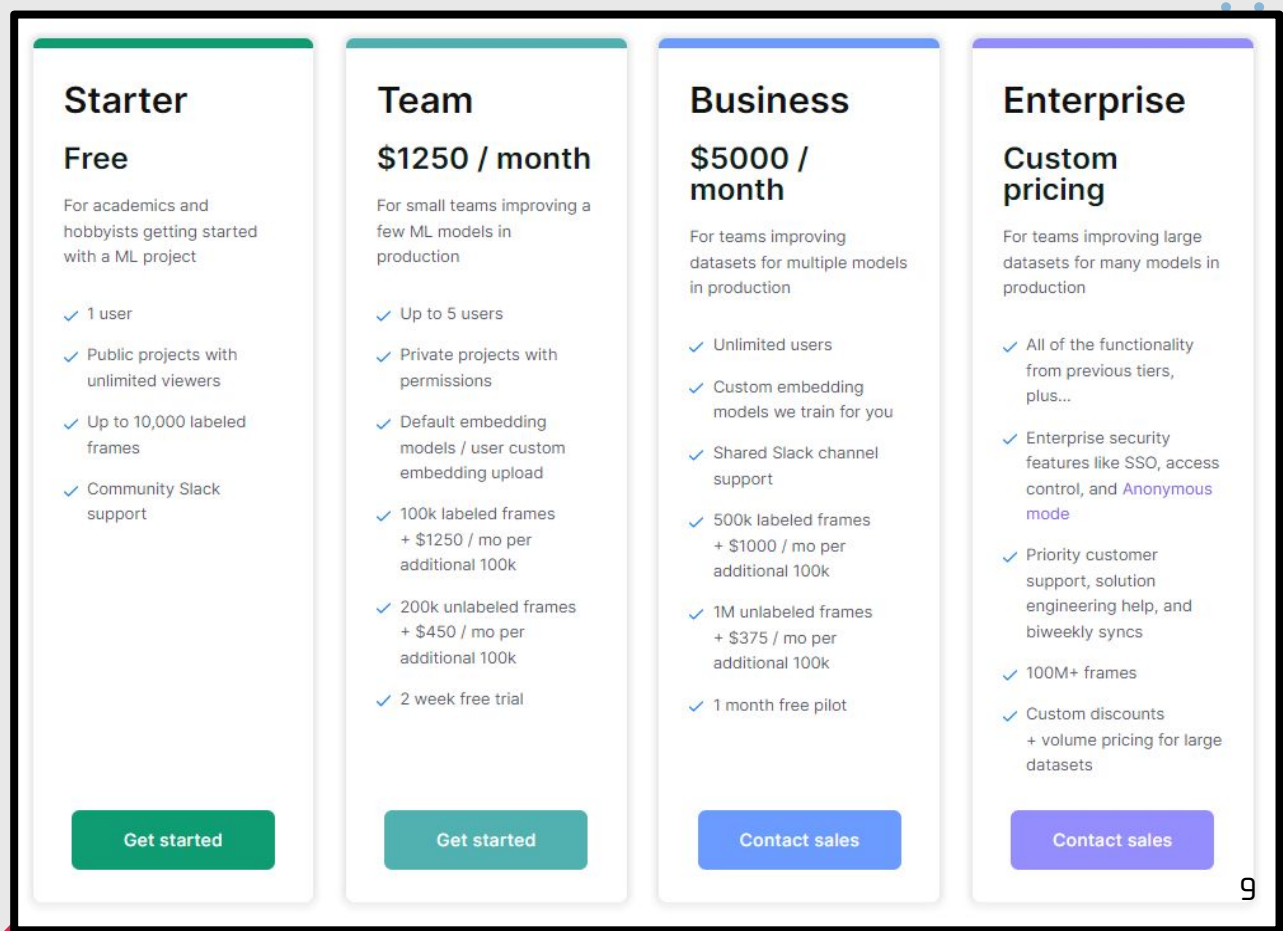

1. Model improvement in **10x less time**[1]
2. **One-stop solution** for embedding generation, processing, and querying
3. **Visual user interface** for inspecting and collaborating on error resolution
4. **Easily collect** more examples across large pools of data
5. **Reliably scale** to datasets with hundreds of millions of data points

This is just the tip of the iceberg!

Business Model

- Aquarium operates on a tiered pricing model
- Each plan offers different levels of access to features

Starter

Free

For academics and hobbyists getting started with a ML project

- 1 user
- Public projects with unlimited viewers
- Up to 10,000 labeled frames
- Community Slack support

Get started

Team

$1250 / month

For small teams improving a few ML models in production

- Up to 5 users
- Private projects with permissions
- Default embedding models / user custom embedding upload
- 100k labeled frames + $1250 / mo per additional 100k
- 200k unlabeled frames + $450 / mo per additional 100k
- 2 week free trial

Get started

Business

$5000 / month

For teams improving datasets for multiple models in production

- Unlimited users
- Custom embedding models we train for you
- Shared Slack channel support
- 500k labeled frames + $1000 / mo per additional 100k
- 1M unlabeled frames + $375 / mo per additional 100k
- 1 month free pilot

Contact sales

Enterprise

Custom pricing

For teams improving large datasets for many models in production

- All of the functionality from previous tiers, plus...
- Enterprise security features like SSO, access control, and Anonymous mode
- Priority customer support, solution engineering help, and biweekly syncs
- 100M+ frames
- Custom discounts + volume pricing for large datasets

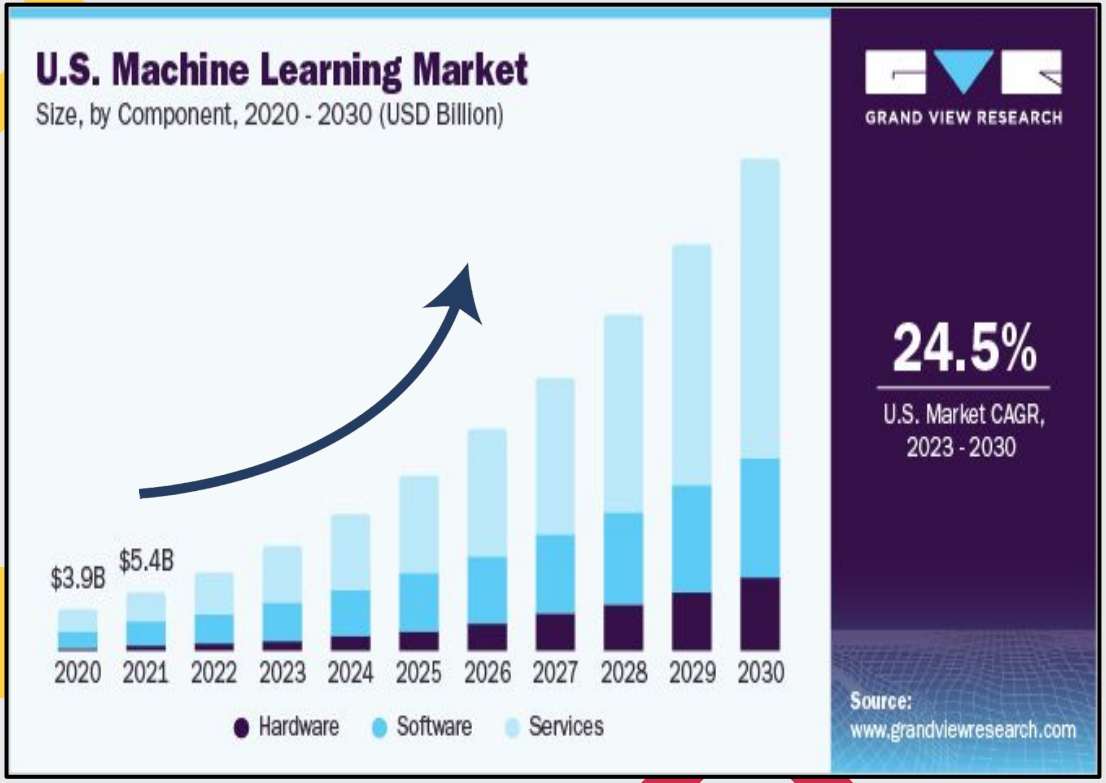

Contact sales

Traction

$2.7 Million In Seed Funding Raised	Raised $2.7M in seed funding from notable investors including Y-Combinator and Sequoia Capital
[1] **$5-10 Million** Estimated Revenue	Estimated earnings ranging from $5 to $10 million, accompanied by a positive users underscoring the platform's efficacy and user-friendly interface.
$419.94 Billion Total Addressable Market by 2030	The TAM for machine learning is set to be $419.94 billion by 2030, which is a significant increase from 2023's TAM of $52.02 billion, showing significant traction.

[1] Revenue sourced from ZoomInfo which is a credible source trusted from JP Morgan, Bank of America, and more

Market Validation

[1]CAGR:

- Increased growth of 34.8% globally per year from 2023-2030.
- Increased growth of USA alone of 24.5% per year

TAM by 2030:

- US $419.94 Billion by 2030

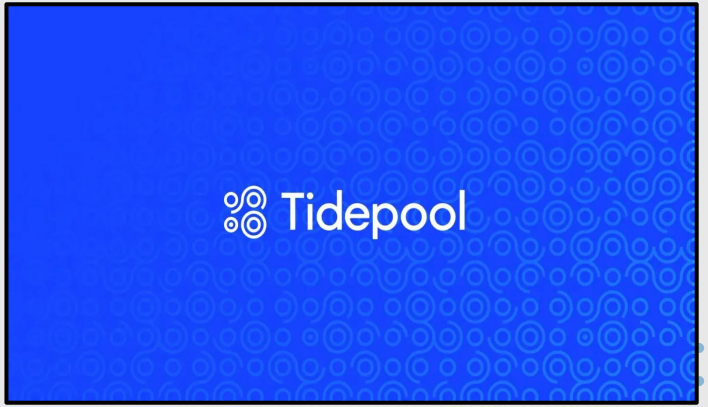

[1] Grandview research is a credible source trusted from Forbes, BBC, Business Insider, Bloomberg, and more

Why invest in Aquarium?

- HP can improve internal ML teams
- No other company has the same sophistication of visual interface for machine learning
- Trusted by companies like Pinterest, Woven planet, winnow, and AMP ROBOTICS
- Unmatched Traction

Expansions to Tidepool:

- Tidepool analyzes chat conversations, user feedback, LLM prompts,and more, helping you make better decisions for your business. This further R&D in the ML space is pushing Aquarium as an emerging market leader.

We just caught the biggest fish from the ocean.

Let's catch this opportunity that **meets all our criteria**

before it slip out of our hands.

Thank you for your time and considering this offer!
